Product Details

- High Sensitivity Silicon Photodiode
- Slim Profile
- Ideal for CW or Pulsed Laser Measurements

The Coherent® PowerMax Wand utilizes a high-sensitivity silicon photodiode for continuous wave or pulsed laser measurement from the ultraviolet to the infrared. The Coherent PowerMax Wand is ideal for power measurements from 8.5µW to over 140mW depending on the laser wavelength, and for pulsed lasers greater than 50pps. This USB-powered laser measurement device utilizes spectrally calibrated filters to attenuate the laser beam, allowing for a higher average power measurement than is typically possible with a photodiode.
