Product Details

- Heated Blade for Optical Fiber Cutting
- Yields Fine Terminations
- Includes Fiber Optic Cutting Block

Packed with a jacket stripper for 1mm jacketed fibers, the hot knife is simply a heated blade that yields clean terminations. This type of termination is especially useful in cutting fibers flush with a housing or aperture, and cutting fibers or light guides in sizes larger than our Fiber Optic Cutting Block will accept. Fiber Optic Cutting Block [#54-013](#) included with hot knife.
