U-FF	Model Number:
Fluorescence Filter Kit	Type:
Olympus	Manufacturer:
Dimensions of Compatible Optics (mm): Excitation Filter: 25mm Dia. Emission Filter: 25mm Dia. Dichroic Mirror: up to 38 x 26mm	

Compatible with Olympus BX3 and IX3 Series Microscope		Note:
Physical & Mechanical Properties		
48 x41 x39		Dimensions (mm):
Threading & Mounting		
Excitation Filters: up to 6mm Emission Filters: up to 6mm Dichroic Mirror: up to 1.4mm		Thickness of Compatible Optics (mm):
Regulatory Compliance		
View		Certificate of Conformance:

Product Details

- Ensure Proper Alignment of Filter Sets
 - Easily Adapt to Common Microscopes
 - Available in a Variety of Wavelengths
 - Unmounted [TECHSPEC® Fluorescence Filter Kits](#) Also Available
- TECHSPEC® Pre-Mounted Fluorescence Filter Cube Sets are designed to easily integrate into popular Olympus, Nikon, Zeiss, and Zaber microscopes. Each fluorescence filter cube set consists of one [TECHSPEC Fluorescence Dichroic Filter](#) and two [TECHSPEC Fluorescence Bandpass Filters](#) that have been specifically oriented to achieve optimum excitation and emission of popular fluorophores. Additionally these filters are also used in polymerase chain reaction (PCR) diagnostic instruments. For increased adaptability, filters can be easily removed and replaced to meet the needs of the application. Unmounted [TECHSPEC Fluorescence Filter Kits](#) are also available.
- Built-to-Order Product: Each product is assembled from stock components at the time of your order. If all components are in-stock, your product will typically ship within 3 - 5 days. If you have any questions about delivery or inventory status, please [contact us](#).
