### Product Downloads

### General

Linear Polarizer **Type:**

### Physical & Mechanical Properties

12.7 **Clear Aperture CA (mm):**

25.40 **Diameter (mm):**

**Length (mm):**

31.50

**Construction:**

Crystalline Glan-Laser Polarizer

**Optical Properties**

**Coating:**

Single Layer MgF<sub>2</sub>

**Extinction Ratio:**

<5 x 10<sup>-6</sup>

**Substrate:**

α-BBO

**Surface Quality:**

20-10

**Transmitted Wavefront, P-V:**

λ/2 @ 632.8nm

**Beam Deviation (arcmin):**

<3

**Transmitted Wavefront Distortion (RMS):**

λ/4 @ 632.8 nm

**Wavelength Range (nm):**

200 - 350

**Damage Threshold, By Design:**

5 J/cm<sup>2</sup> @ 1064nm, 10ns, 10Hz

**Regulatory Compliance**

**RoHS 2015:**

[Compliant](#)

**Certificate of Conformance:**

[View](#)

**Reach 247:**

[Compliant](#)

**Product Details**

- High Extinction Ratios up to 200 000:1
- High Laser Damage Thresholds up to 5 J/cm<sup>2</sup> @ 1064nm

Glan-Type Polarizers are mounted, polarizing prisms used in applications that require broad spectral ranges, high extinction ratios, or high polarization purities. Glan-Taylor Polarizers are medium-power, air-spaced UV to NIR polarizers that transmit the extraordinary beam. The ordinary beam is then reflected and absorbed by black glass plates that have been cemented to the prism. Glan-Laser Polarizers are similar to Glan-Taylor, but are designed for higher power applications and appropriate for use in Q-switched laser cavities. Glan-Laser Polarizers utilize an advanced polishing technique for minimizing surface scatter and feature two escape windows for passing the high power rejected light. Glan-Thompson Polarizers are low power polarizers that are ideal for UV, visible, or NIR applications, feature a cemented design, and transmit the extraordinary beam while absorbing the reflected ordinary beam.

**Technical Information**

Glan-Taylor Polarizers
