International Light Technologies Spectrometers are compact mini spectrometers that measure both the wavelength and amplitude of the targeted light as well as other calibrated measurements. These instruments offer exceptional wavelength accuracy and resolution allowing for use in various sensitivity applications. SpectriLight III software is included with each product, which is a LabView based software for windows that enables seamless spectra collection and analysis. International Light Technologies Spectrometers are available in three wavelength models, UV, UV - VIS, and Broadband each with an included right-angle diffuser. These spectrometers are ideal for applications such as UV Curing Characterization, Plant Photobiology, Fluorescence, Radiometry, and Photometry.
